

PRTM-PZDR4

4-Channel Piezo Driver for MTCA

PIEZOTECHNICS

HIGHLIGHTS

- Supports 4 actuators and sensors
- Unipolar and bipolar operation
- Digital voltage and current readout
- Encapsulated in metal housing
- Internal high-voltage source with external high-voltage input option

APPLICATIONS

- Science: Particle and optical beam control
- Particle accelerator: RF Cavity frequency control
- Laser optics: Stretcher and switcher for optical fiber control, mirror steering, synchronization of pulsed lasers, fiber link stabilization etc.
- Industry: High-end piezo controller in production systems, laser control, precision object positioning

FEATURES

- MicroTCA.4 Rear-Transition Module (RTM)**
- Typical bandwidth of 50 kHz with 0.1 μF piezos
- Digital output sampling with 200 kSPS
- Switchable actuator and sensor functionality
- Unipolar: 0 ... +100 V and bipolar: ± 100 V operation
- External high-voltage input for up to 120 V/ 500 mA
- Interlock signal support via Zone 3 or front panel
- Analog low-voltage monitor outputs on front panel

The 4-channel Piezo Driver is a general purpose Rear Transition Module (RTM) board compatible to the MTCA.4 standard.

The module supports simultaneous driving and sensing of four piezo elements. The small signal bandwidth of the piezo driver is in range of 50 kHz when driving pure capacitance loads of order of 0.1 μF with an output voltage signal level of 5 V_{pp}.

For driving and sensing circuits the PRTM-PZDR4 module allows a sampling rates of up to 200 kSPS on each channel. The most critical circuits are monitored using general purpose ADCs and temperature sensors.

The actuator and sensor functionality can be toggled remotely using relay-switches. The drivers are deactivated whenever an interlock signal is active.

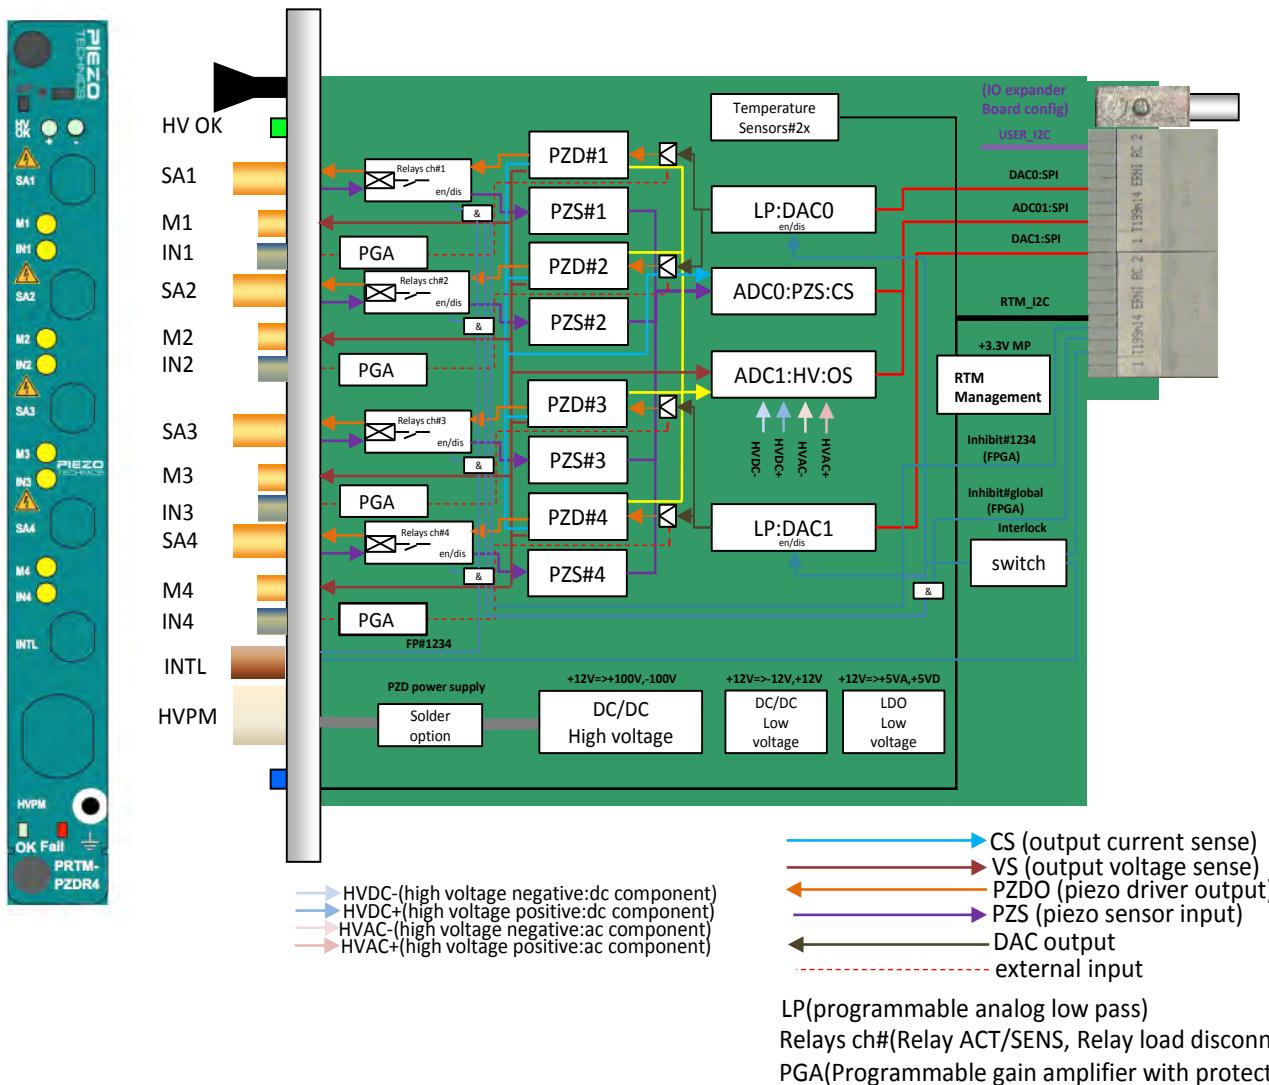

Piezoelectric elements can be powered using unipolar or bipolar power supply. Power can be provided internally via on-board generators or via an external power input.

Proven track record in large-scale physics experiments (DESY, CERN, KEK, Pohang ...).

TECHNICAL SPECIFICATIONS

GENERAL DATA		
Function	4-channel piezo driver with 4 actuator inputs	
Operation modes	unipolar, bipolar	
Driver type	DAC + high power amplifier	
High-voltage (HV) options	Internal DC-DC converter External front panel input	
Output levels	Internal HV: External HV (max.)	0 - 80V / -80V - +80V 0 - 120V / -120V - +120V
Output power	Internal HV: External HV (max.)	100mA RMS / Number of active channels (=max. sum current) 500mA RMS / Number of active channels (=max. sum current)
Power consumption	Internal HV:	30W max.
ARCHITECTURE		
Physical dimensions	RTM	Double width, Mid-Size Width: 148.5mm Depth: 180.6mm
Compatibility	Zone 3 Compatible AMCs	Class D1.0, D1.1, D1.2 DAMC-FMC20, DAMC-FMC25, DAMC-TCK7
CONNECTORS		
Piezo connectors	Piezo actuator outputs (A1...A4)	Connector type Output load (R_{load}) Output bandwidth (3 dB)
		DC - 300 Hz ($V_o = 140 \text{ Vpp}$ @ 6 μF): cavity tuner DC - 20 kHz ($V_o = 0.5 \text{ Vpp}$ @ 1 μF): laser DC - 50 kHz ($V_o = 5 \text{ Vpp}$ @ 100 nF): link
		DAC resolution Channel crosstalk Overcurrent protection (HV shutdown)
		18-bit better -60 dB channel-to-channel I _{max} =500mA for each channel
		Input impedance Input voltage range Input bandwidth (3dB) Channel crosstalk
	Piezo sensor inputs (S1...S4)	2.4 k Ω 2 Vpp DC - 20 kHz better -60 dB channel-to-channel
Analog monitor Outputs	Piezo driver output or current feedback (M1..M4)	Connector type Output voltage range
		single-ended MMCX, 1-pin $\pm 8 \text{ V}$
Piezo driver inputs	Multiplexed with internal DAC (IN1..IN4)	Connector type Input voltage range Input impedance Channel crosstalk
		single-ended MMCX, 1-pin $\pm 1 \text{ V}$ 1 k Ω better -60 dB channel-to-channel
Interlock input	Global interlock (1 channel)	Connector type Signaling standard
	Single-channel interlocks (optional)	EIA-422 or 3.3V-5V digital signal 3.3V-5V digital signal
High voltage input	HVPW	Connector type Contacts
PE terminal		Connection type
OTHER FEATURES		
Environmental	In-crate operation	Operating temperature Storage temperature Relative humidity
		0 - +50°C -40 - +90°C 5 - 90%, non-condensing
OTHER		
Compliance	RoHS	

FUNCTIONAL BLOCK DIAGRAM

OPTIONS

PRTM-PZDR4 - A-B-C-D

Piezo connector type

- A 7 = 7-pin Piezo connector
B 4 = 4-pin (reserved)

Interlock mask [S3: 1-4]

- D 1111 = interlock to all channels

Please contact manufacturer

High voltage power supply option

IB = Internal bipolar

IU = Internal unipolar

E = External bipolar or unipolar

Interlock sources [S2: 1-4]

- C 1000 = default: interlock off

Please contact manufacturer
